# Align

---

Align table is designed for easy and quick alignment of tables. It is a transformable table accommodating one person, two-persons, or three-persons. It can be utilized in various communication settings such as training, workshops and team works. With ergonomic smooth design, it liberates users and spaces.

Connected to the post are two legs that spread apart in a V shape to prop up the tables when stacked upright. Thus, the table design is functionally efficient as well as simple and aesthetically appealing.

Tug lightly on the lock handle and the gas spring will gently lift the tabletop.

A connecting device on the underside of the tabletop will secure adjoining tables.

The casters are a blend of tenacious nylon and smooth urethane to provide the best of both worlds.

The modesty panel is made of high-grade ABS, lightening the table and offering an un-restrained feel.

The classy podium along with the mobile wagon for holding various training aids will boost communication effectiveness. The podium is mounted on casters for better mobility, and supports are attached to the base to keep the podium from moving while in use.

All boards are magnetized and can be used to post various items during meetings or presentations.

Special connectors are used to link the boards on either side.

The triple-shelf wagon is a handy way to organize and move various training aids such as a projector.

The acrylic modesty panel on the podium front is curved for a softer, more elegant look.
